Research is one of the most promising fields that not only helps one to succeed in higher education secgor but also contributes to policy making in the country.

In pursuit to contributing to quality research in multi disciplinary research in the country we provide research consultancy to all those who wish to make their careers in research.

We provide research consultancy for the various academic research projects undertaken

Research consultancy comprises of training to understand research methodology, developing data collection tool, data collection, data analysis and interpretations and suggestive policy initiatives

We have a team of field surveyors that can carry out field work in the country

We train the interested ones in carrying out data analysis using SPSSS, R-Software and N-Vivo software(for qualitative research)
